How One Minister Feels About It

I am a little red seal. I am stamped on letters and packages at Christmas time. I carry the Christmas spirit of goodwill. I go as a gift to the cause of Mankind. Just as the Christ Child came as a gift to a world in trouble, so I go as a gift for folk who are suf-fering. And I have the satisfaction of knowing I am helping people. Tuber-collecis is preventable and generally curable. In 1910 the death rate in Michigan was 97.6. Thus far this year it is only 79.8. So you see I am helping and winning. I am only a little red seal, but I am in big business. I like to have old folk as my partners and I am mightily tickled to have children. So buy me-everybody! Use me! Send me! And here's to the happiest Christmas you ever have "Inasmuch'

EDWIN W. BISHOP. Paster Plymouth Church, Lansing, Mich.

Samuel Gompers Says-

I am very glad to express my own personal interest in and endorsement of the fourteenth annual Christmas Seal Sale to be held in December of this year. I sincerely hope that this annual event will result not only in a nuch wider extension of the educa-tional message of the National Tuber-chlosis Association and its affiliated agencies than has been possible here-tofore, but that it will bring to your organization a sufficient revenue with which to carry on their life-saving

work during the year 1922. I am mindful of the tremendous toll that tuberculosis takes among working men and working women. So long as this disease takes at least one out of every six deaths from the ranks of workers in this country, so long will the American Federation of Labor stand shoulder to shoulder with the national, state and local tuberculosis associations of the country in their efforts to suppress this deadly plague.

With sincere appreciation of the work that you are doing, I am Very truly yours, (Signed) SAML GOMPERS, President, American Federation of Labor.

"Rejected"

By Leo P. Cook. On an early summer day of 1918 the Michigan College of Mines was receiving recruits for its special training course for soldiers. They had been sent in by draft boards from various parts of the upper peninsula. As a reporter I was on hand to size up the new men and to pick up such human DIG IN FRIEND DIG IN. terest news as might serve to dress With Apologies to up the routine stuff of the day.

Out from the medical examiner's office came a big young fellow. He was better than six feet tall and he obably stripped at 180. He picked his suitcase out from among a collection in the hall and started away from the building, headed out of the camp-us, in palpable dejection. He looked like human interest stuff and, with the genial effrontery that a reporter knows how to get away with after a few years of practice, I accosted him. To put it bluntly the youth had been declined by his country in need beause he had TB. He was tuberculous,

consumptive. Up to that moment I had rather entertained the idea, at least for some years, that it was nothing short of criminal for a man to permit himself to become a tuberculosis victim, and especially in Houghton county. Had not been educating the people? Had I not written literally hundreds columns of educational matter on the Great White Plague? We had preached the open window, and clean iving, and outdoor air and good food, and here was a great, husky chap, splendid material for a soldier, who was going home, maybe to die.

He typified to me the necessity for eternal vigilance, for persistent, untiring perseverance in the work against the plague. And that is why the state and country associations must be maintained at their fullest capacity and their highest efficiency, not for a time but forever more.

And he is but one of legion, and I want to do my little share in preventing such tragedies by making the organized fight against tuberculosis a vigorous one in every county in the should not be sent away alone to a state. Some of us cannot engage in new community where no one cares that work actively, but all of us can for him except to get his money, and help it by pushing the Christmas seal where there is every inducement to sale at Christmas time. The seals are become lonesome and homesick. Peace the ammunition in the battle against of mind is as necessary as a quiet this disease and we can all help to body.-"Public Health." provide more ammunition by buying seals ourselves and encouraging others to buy.

A Contrast

(All Figures Prepared by Bureau of /ital Statistics, State Dept. of Health) N THE YEAR of our Lord SOME PEOPLE in Michigan BOUGHT CHRISTmas seals to fight TUBERCULOSIS and ROM THAT day to this THAT FIGHT has been on AND SINCE 1910 MORE people have bought CHRISTMAS seals so more FIGHTING could be done

UNTIL TO-day the death-rate FROM TUBERculosis in OUR GOOD state 4s way down TO 79.8 IN SPITE OF increase In pop. AS COMPARED with the rate

WHEN THE first seal was sold AND THAT is what was.

THIS IS WHAT MIGHT HAVE BEEN (All Figures Prepared by Bureau of Vital Statistics, State Dept. of Health)

IF there had been no seal OR MICHIGAN'S good people HAD NOT bought so generously TO HELP furnish the sinews

CF THIS WAR it is safe TO BELIEVE the death-rate OF TO DAY would be the same as

OR GREATER than the rate OF 1910 AND IF it had remained as 1910

1920 WOULD have seen 585 MORE Michigan funerals AND TUBerculosis would

BE THE GRINNING gainer BUT SINCE 1910

LIVES HAVE been saved in our state FROM T. B. alone

and L. F. B. Be a "Fresh-Air Crank"

To avoid tuberculosis keep strong and healthy. Be a "fresh air crank." Insist on pure air day and night, sum mer and winter, in your homes, workshops, office, school rooms, street cars, theaters, and every other enclosure in which you must spend part of your Avoid unventilated, over-heated, time. crowded enclosures. These are incubators for tuberculosis germs. Avoid dusty places. Dry sweeping and dry dusting are dangerous practices. Be fore moving into a new house have it thoroughly aired, cleaned and washed: the former occupant may have been consumptive. Never put pencils, coins or other things commonly handled by other persons in your mouth. Sunshine and fresh air are the greatest enemies of tuberculosis. — "Public Health."

Don't Worry Do not forget the mental condition

of the tuberculous patient. Worry, no matter what the cause may be, homesickness are retarding factors. They simply must not be. Keep away all mental disturbances if possible, and it is usually possible. Too much company, too many relatives ,someone on the premises nagging, the worry over money and many other annoy ances can and should be obliterated No homesick patient ever recovers Sending patients away is often unjustifiable. Only those should be sent away who can go and remain long enough to be cured, if curable, with out any worries regarding finance. He

Christmas Seals Save Babies

Behold here ranged on the Double Red Cross a group of "one hundred per cent" bables. Every one of these tots is fat and healthy. Their smiles alone would tell you that they don't know what illness is. They never have been ill and they have a mighty good chance to grow up into strong men and women. To help make and keep all bables in Michigan like this group is one of the aims of the Michigan Tuberculosis Association. The Christmas seal will help to do this

THE WHITE DEATH

By A. P. JOHNSON, Publisher of the Grand Rapids News

When, along with war, the world plification of the service rendered by has rid itself of tuberculosis, we will the gentle Nazarene.

Look for the Christmas seals. Don't sale.

Look for the Christmas seals. Don't wait for any one to ask you to buy the suffering that exists. It is safe to them. The soldiers and sailors, sick

Christmas stickers were placed on sale.

Miss Bissell secured the support of Philadelphia stores, the managers of From such small say that when we stamp out tubercu-losis we will free man's mind of many benefit by the sale of these seals, did But the idea caught on from the first. war, for poverty, for social and economic depression.

I shall not go into figures. They are a few, a very few, go through life without scarred lungs. Only a few escape at least a touch of the germ that not all scars. They are open, bleedheraids the "white death". So uni-versal is this disorder that within two a fertile field for tuberculosis. If generations of nearly every family it claims one or a number. Tuberculosis is man's bitterest opponent, his most uncompromising antagonist, his dead-

Tuberculosis is distinctly a product of civilization. It does not inhere in the natural organic life. It's a cowardly disease that attacks the oppressed, the depressed, the weak, the unsuspecting. It follows usually in the path of other disorders brought about by exposure or carelessness. The carrion waits for its prey to die. Other carniverous animals, in proportion to their strength and bravery, or as they may be pressed by hunger, meet their prey in struggle. Not so with tuberculosis. It seeks its victim after the struggle from which the sufferer may have

survived. Nothing yields with greater readiness to any form of opposition than cowardice. That is one reason why uberculosis can be exterminated. It is the great human disorder that we know can be stopped. Tuberculosis fears the air, the sunlight. It shurs kindness, care and attention. Like the creeping, crawling things that dwell under stones and scrubs and revel in dark, dank places, it scurries off and burrows itself elsewhere when the stone is turned and the sun's bright rays penetrate the gloom. To be cured of tuberculosis requires less medicine than is necessary to banish the simplest stomach ache. What is required is air, sunlight and rest. Knowing this, what would you not do to provide these rich gifts in their utmost abundance for those upon whose cheek is stamped the shadow of the white

death? And suppose that effort consisted place upon a letter. Suppose you were assured that the letters you send out will to men could also for the price of who are threatened by, or the state of the s

of the abnormalities that make for not wait to go into action when you were in danger. Yes, you did yours, we all did ours, when the romance and fever of war stirred our blood and too staggering. Let it suffice that only melted our hearts. But there yet remain among us many of those who bear the scars of war. And they are a fertile field for tuberculosis. If Christmas has ever meant anything to you, let it be the means of remembering these men-all men and women-fighting the white death. Come quick and come clean for the

Until Then

Science has quite definitely established the fact that practically all adult persons in civilized countries are infected with tuberculosis. Only correct life habits taught from infancy can bring about any very ma-terfal decrease in the deaths. When everybody in all civilized countries knows all the important facts about tuberculosis and when everybody has the influence of several generations of correct living behind him-then, perhaps, there will be no more need to buy Christmas seals.

The tuberculosis problem is so in-And suppose that effort consisted timately bound up with those pertainmostly of buying a stamp such as you ing to the general public health that its detachment is impossible. It has been shown by figures that the introaround Christmas time carrying good duction of pure water supplies and improved sewage disposal has not a stamp, be the means of carrying life only reduced deaths from typhoid to those who are threatened by, or fever and other intestinal diseases,

Why I Buy Christmas Seals And Why You Should Buy Them

WILL ROSS

When I see Christmas Seals on sale in the drug stores and department stores and sold by smiling young women in the postoffice lobbies, or when little school children importune me to buy them, I do not think of these brightly colored little seals as simply strips of gaudy paper. To me they are smiling, bright, active little individuals, each one of them filled with one cent's worth of ability to help drive out this scourge of tuberculosis.

Perhaps tuberculosis means more to me than it does to you. Perhaps it does for I have had it, and I know what it means to be shut up for weeks and months, into the years, fighting this disease that only time, rest, good food, fresh air, and persistence can hope to beat.

And I buy Christmas Seals gladlyup to the limit of my ability. Perhaps I even stretch this ability a bit. For to me each one of these seals brings up visions of well equipped tuberculosis sanatoria where those with tuberculosis are given a fighting chance to get well; of visiting nurses chance to get well; of visiting nurses going into homes to relieve those already afflicted and to protect the well against the dangers of contracting the disease; of open air schools where little children are building up a resistance against disease before disease has had its chance to fasten upon them; of day camps, of free dispensaries, of books teaching the lessons of right living, of free clinics—of a hundred and one things that are being done to free the world from tuberculosis.

The organized women to the children sale and women is the children sale and to the last man—if I may be allowed that expression," said Mrs. Wm. R. Alvord, president of the State Federation of Women's Clubs. "In very many of the citles in the state the Woman's Club is in charge of the seal sale each year, and wherever there is a woman's club it is invariably in sympathy with the efforts that are being made through the annual seal sale to the last man—if I may be allowed that expression," said Mrs. Wm. R. Alvord, president of the State Federation of Women's Clubs. "In very many of the citles in the state the Woman's Club is in charge of the seal sale to the last man—if I may be allowed that expression," said Mrs. Wm. R. Alvord, president of the State Federation of Women's Clubs.
